Summary

Computer Science undergraduate with strong foundations in C/C++, Object-Oriented Programming, Data Structures and Algorithms, having solved 800+ competitive programming problems. Experienced in developing and deploying full-stack web applications using React.js, JavaScript, Node.js and SQL, with hands-on experience in REST APIs, authentication, and maintaining data integrity through database transactions. Familiar with the software development life cycle (SDLC), user-facing application development and collaborative problem-solving.

Education

G. Narayanamma Institute of Technology and Science Aug 2024 – Apr 2028
B.Tech in Computer Science *CGPA: 9.51 / 10.0*

Technical Skills

Languages: C, C++, Python, JavaScript, SQL
Frontend & UI: HTML5, CSS3, React.js, Tailwind CSS, Responsive Web Design, Figma
Core CS: Object-Oriented Programming & Design, Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks
Backend & Databases: Node.js, Express.js, REST APIs, JWT Authentication & Authorization, PostgreSQL, MongoDB
Tools & Platforms: Git, GitHub, Postman (API testing & debugging), Vercel, Render, Cloudinary

Projects

Annapurna – Food Safety Intelligence Platform | *MERN, JWT, Cloudinary, Tailwind* Apr 2025 – Aug 2026

- Developed a full-stack web application with role-specific interfaces for customers, restaurant owners and administrators, enabling food-safety reporting, image-based evidence submission and allergen discovery.
- Implemented JWT-based authentication, role-based authorization, image uploads and moderation workflows to support secure interactions across different user roles.
- Designed an explainable food-safety scoring mechanism; deployed using Vercel, Render and MongoDB Atlas. [Live]

RecallGraph – Supply Chain Recall & Traceability Platform | *React, Node.js, Express.js, PostgreSQL* Aug 2026

- Built a full-stack application to trace material lots across production batches, products, warehouses and shipments, helping users identify affected inventory during product recalls.
- Implemented PostgreSQL transactions and row-level locking to maintain data integrity and inventory consistency during concurrent recall operations.
- Developed warehouse quarantine and audit-tracking workflows to improve traceability and accountability. [GitHub]

Achievements & Awards

- **Reliance Foundation Undergraduate Scholar** – Rs. 2,00,000 merit scholarship (Jan 2025)
- **CWiCS Boost 6.0 Mentee** – Top 1,000 women engineering applicants nationwide (2026)
- **JEE Main:** 97 Percentile (Top 3%); **JEE Advanced:** 102/360; **TS EAMCET Rank:** 977 (2.5 lakh+ candidates)

Hackathons & Competitions

- **NASA Space Apps Challenge – National Finalist** (Oct 2025) – Ideated MIRIS, a closed-loop system that turns space-mission waste into reusable materials for long-duration Mars missions.
- **First Prize, International Essay Competition** – BPP University, London, Rs. 1,00,000 (Dec 2025)
- **VNR VJIET Solution Sprint – Finalist** for Annapurna (Apr 2025)

Leadership & Positions of Responsibility

Vice President – GDG on Campus Aug 2026 – Present
Leading a 100+ member technical community; coordinating coding sessions, workshops, and peer learning.

Campus Ambassador – VedaVerse Dec 2024 – Nov 2025
Engaged 200+ students through technical initiatives and campus outreach.
